

ELiTE ProPanels™

Fabric-Wrapped Fiberglass Panels

PRODUCT DESCRIPTION

For the professional needing highly aesthetic acoustical treatments, ELiTE ProPanels cover the spectrum. From stock 2'x4' panels with beveled edges, to custom sizes and styles with your choice of more than 150 fabric options, ProPanels are able to meet the highest standards of the most demanding customer. The stock 1" thick, 2' by 4' panels have a 0.80 Noise Reduction Coefficient (NRC), making them the perfect choice for improving the accuracy and clarity of the sound field in various acoustical environments. The three levels of decorative, fabric-wrapped absorptive panels all meet Class A Fire Rating per ASTM-E84.

BENEFITS

- Absorbs slap and flutter echo to provide a more pleasing and accurate listening environment
- Class A fire rating to satisfy the most demanding fire code requirements
- Wide variety of finishes, styles and colors provide a multitude of decorative options
- Cost-effective acoustical alternative when stretched fabric systems are not required
- Chemically hardened edges for better appearance and durability
- Can be used in a wide variety of applications and facilities

APPLICATIONS

- Residential Theaters/Cinemas and Listening Rooms
- Houses of Worship
- Recording Studios and Audio Production Facilities
- Auditoriums, Theaters, Gymnasiums, and Performance Facilities
- Classrooms and Lecture Halls
- Board Rooms and Meeting Facilities
- Offices, Training Centers and Teleconference Facilities
- A myriad of other Commercial Facilities
